

## CityMotoRacer

Thank you for purchasing this Game.

MotoRacer game can be build to android,ios & windows phone 8.  
It is strongly recommend to import this package in an empty Project to avoid tag and iTween conflicts.

### **BUILD SETTINGS**

Make sure you added these scenes as per order.

### **Scripts :**

#### playerBIKEControl.cs

This script will control player bike based on mobile acceleration input or key input.

#### GamePlayController.cs

This script will create new rocks, side objects, traffics cars, Rock Mountains etc.

#### EndScoreDisplayer.cs

This script will have a static event showFullScreenAd ,  
You can make ad network calls to display ads when it is fired .
